Description for Invention Funder

Invention funder is a place for product inventors to connect with investors by posting their project (to attract investors). Here's how the process works:

Generally there are 3 types of users will use this plateform(Inventor, Investors and admin). How they use this plateform.

1.Inventor:-

Registration

Inventor will visit our site and for put there idea or product in Invention funder have to register them self. So go to register button then choose his role like(inventor or investor). Then inventor will register there self as a inventor by filling some details like(name, last name, email, phone, company, website…etc). In this registration process for email verify an email come to inventor mail to verify his email after that inventor will store in our site as a unapprove inventor so he has to wait till admin approval… that time we will send an email to inventor for informing them that you have to wait for admin approval after approve you can use this panel.

And one more email will also go to admin to inform him to new inventor in your Invention funder site so please confirm them..

After that **admin go to his admin panel** and can do **(approve or reject)** to inventor ..

Rejected: If admin reject then email go to inventor that your profile rejected..

Approved: if admin approve inventor then email go to inventor that you can use panel now with email and password registered during registration..

After login with email and password inventor will get an inventor dashboard

1.Steps for put idea or product

Inventor will put product or idea with full documents and description with his dashboard then that request will go to admin for **(approval or reject)**

Approve: if approve then idea will show on our website inventor funder.

Reject: if rejected then with reason or rejection show in inventor dashboard ..so inventor will know the reason or may try again…

Inventor can manage or view these with his dashboard(inventor dashboard menu)

1. All idea or product list added by inventor only (can also edit there idea not all fields)

2. Logout

3. Investors interested idea list------   (can chat/meeting/call) with investors who are interested in your idea.

2.Investor:-

Investor will visit our site and for get or purchase there idea or product with Invention funder have to register them self. So go to register button then choose his role like(inventor or investor). Then Investor will register there self as a investor by filling some details like(name, last name, email, phone, password…etc). and after that login with registered details email and password go to investor dashboard ..

Investor can manage or view these with his dashboard(Investor dashboard menu)

1. All ideas list
2. Favorite list   -> all favorite list added by investor themselves.
3. Interested idea list(confirm)-> (really want to purchase that idea)---   chat/meeting/call..
4. logout

3.Admin:-

Admin will go to his dashboard after login with his credentials (email & password).

Admin can manage or view these with his dashboard(Admin dashboard menu)

1. all approved Inventor list
2. All Investor list
3. All idea list
4. All Interesed idea list ------can (chat/meeting/call)
5. new Inventors list ---------- if new inventor come then admin will approve or reject them
6. new Idea list ---------- if new Idea come then admin will approve or reject them
7. logout
